

Ideation Phase Empathize & Discover

Date	1 October 2026
Team ID	SWTID-2026-8511
Project Name	Implement Client Script and UI Policy (Incident)
Maximum Marks	4 Marks

Empathy Map Canvas:

An empathy map is a simple, easy-to-digest visual that captures knowledge about a user's behaviours and attitudes. It helps teams better understand their users. Creating an effective solution requires understanding the true problem and the person who is experiencing it. The map helps the team consider things from the user's perspective along with their goals and challenges.

User for this map:

A service desk agent who creates and updates incidents in ServiceNow every day and needs the Incident form to guide them to complete, correct data.
