

Project Design Phase

Proposed Solution Template

Date	1 October 2026
Team ID	SWTID-2026-8511
Project Name	Implement Client Script and UI Policy (Incident)
Maximum Marks	2 Marks

Proposed Solution Template:

Project team shall fill the following information in the proposed solution template.

S.No.	Parameter	Description
1.	Problem Statement (Problem to be solved)	Service desk agents who log incidents in ServiceNow often miss mandatory or conditional fields and save wrong or incomplete data, because the Incident form has no client-side rules to guide, hide or validate fields. This causes rework, reopened incidents and slow resolution.
2.	Idea / Solution description	Add a UI Policy on the Incident form to show or hide fields and make fields mandatory or read-only based on Category, Priority and State. Add Client Scripts (onChange, onSubmit) that alert the agent and validate the details before the incident is saved. The rules are tested with sample incidents.
3.	Novelty / Uniqueness	The rules run in the browser, so the agent gets feedback while filling the form instead of after saving. UI Policy handles simple field behaviour without code, and Client Scripts handle only the checks that need logic. It uses standard ServiceNow features, so no extra plugin or cost is needed.
4.	Social Impact / Customer Satisfaction	Agents spend less time on corrections and feel more confident about their data. Callers get faster resolution because resolvers receive complete incidents. Beginners learn which fields matter from the form itself.
5.	Business Model (Revenue Model)	This is a learning project with no direct revenue. The value is saved agent time and fewer reopened incidents. The same solution could be offered as a configuration service to organisations that use ServiceNow.
6.	Scalability of the Solution	The same UI Policy and Client Script approach can be reused on other tables (such as Problem or Change) and extended with new fields and conditions without redesign. It runs on the ServiceNow platform, so many agents can use the form at the same time.
