

**Project Development Phase
Model Performance Test**

Date	1 October 2026
Team ID	SWTID-2026-8511
Project Name	Implement client script and UI policy (incident)
Maximum Marks	

Model Performance Testing:

Project team shall fill the following information in model performance testing template.

S.No.	Parameter	Screenshot / Values
1.	Data Rendered	Incident records from the ServiceNow Incident table (incident) displayed in the Incident form and list view, with fields such as Number, Caller, Category, Urgency, State and Short description.
2.	Data Preprocessing	Not applicable - data is read directly from the ServiceNow table. Mandatory-field checks and field-value validation are handled by the Client Script (onSubmit / onChange) before a record is saved.
3.	Utilization of Data Filters	Incident list filtered by conditions such as Category, Urgency and State. UI Policy conditions (e.g. State is Resolved / Closed) control which fields are mandatory, read-only or hidden.
4.	DAX Queries Used	Not applicable - DAX is a Power BI feature. This project uses client-side JavaScript (Client Scripts) and UI Policy conditions instead.
5.	Dashboard design	No of Visualizations / Graphs - 0 (not applicable; project is form customisation. Add Incident-by-Category / Urgency report screenshots here if you created any).
6.	Report Design	No of Visualizations / Graphs - 0 (not applicable; add Incident report screenshots here if you created any).
