

Project Development Phase

Model Performance Test

Date	1 October 2026
Team ID	SWTID-2026-8511
Project Name	Project - Implement client script and UI policy (incident)
Maximum Marks	

Model Performance Testing:

Project team shall fill the following information in model performance testing template.

S.No.	Parameter	Values	Screenshot
1.	Project Summary	ServiceNow customization of the Incident form using a UI Policy and Client Scripts. The UI Policy makes fields mandatory, read-only or visible based on conditions (e.g. category, state, priority). Client Scripts (onLoad / onChange / onSubmit) validate user input and show alerts. Note: If the entered data satisfies the conditions, the incident is saved; otherwise an error message is shown and the submission is blocked.	<i>[Insert screenshot: Incident form with UI Policy applied]</i>
2.	Functional Test Results	UI Policy test cases passed: fields toggle correctly (mandatory / read-only / visible) as conditions change. Client Script test cases passed: onChange and onSubmit validations behave as expected.	<i>[Insert screenshot: Test results / form behaviour]</i>
3.	Validation and Error Handling	Valid input - the incident record is created and saved successfully. Invalid or missing input - the client script shows an error message and prevents submission until the data is corrected.	<i>[Insert screenshot: Error message on invalid input]</i>
